

North Star Flyers: Icing for Piston Pilots

Please note: Facility limitations restrict attendance at this seminar to members only. Please contact Jack Shelton, FAAST representative, if you would like this seminar presented at another venue. The turn of seasons from summer to winter exchanges one set of hazards for another. No longer are thunderstorms the worry; icing conditions take over. In this seminar we will discuss icing in depth - its causes and effects, forecast products, and the tools pilots need to avoid and, when necessary, escape from it.

Directions: The meeting will be held in the classroom at Sim Flite Minnesota, in the first floor of the red and white hangar adjacent to RC Avionics at Anoka County Airport.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area
